

Numerical Treatment of Multiphase Flows in Porous Media

Filesize: 7 MB

Reviews

It is simple in go through preferable to comprehend. It is full of wisdom and knowledge It is extremely difficult to leave it before concluding, once you begin to read the book.

(Leif Predovic)

NUMERICAL TREATMENT OF MULTIPHASE FLOWS IN POROUS MEDIA

To read **Numerical Treatment of Multiphase Flows in Porous Media** eBook, you should access the web link beneath and download the file or have access to additional information which might be highly relevant to NUMERICAL TREATMENT OF MULTIPHASE FLOWS IN POROUS MEDIA ebook.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the International Workshop Held at Beijing, China, 2-6 August, 1999 | The need to predict, understand, and optimize complex physical and chemical processes occurring in and around the earth, such as groundwater contamination, oil reservoir production, discovering new oil reserves, and ocean hydrodynamics, has been increasingly recognized. Despite their seemingly disparate natures, these geoscience problems have many common mathematical and computational characteristics. The techniques used to describe and study them are applicable across a broad range of areas. The study of the above problems through physical experiments, mathematical theory, and computational techniques requires interdisciplinary collaboration between engineers, mathematicians, computational scientists, and other researchers working in industry, government laboratories, and universities. By bringing together such researchers, meaningful progress can be made in predicting, understanding, and optimizing physical and chemical processes. The International Workshop on Fluid Flow and Transport in Porous Media was successfully held in Beijing, China, August 2-6, 1999. The aim of this workshop was to bring together applied mathematicians, computational scientists, and engineers working actively in the mathematical and numerical treatment of fluid flow and transport in porous media. A broad range of researchers presented papers and discussed both problems and current, state-of-the-art techniques. | Mathematical and Numerical Techniques in Energy and Environmental Modeling.- Domain Decomposition for Some Transmission Problems in Flow in Porous Media.- Numerical Subgrid Upscaling of Two-Phase Flow in Porous Media.- Numerical Simulation of Multiphase Flow in Fractured Porous Media.- The Modified Method of Characteristics for Compressible Flow in Porous Media.- A Numerical Algorithm for Single Phase Fluid Flow in Elastic Porous Media.- On the Discretization of Interface Problems with Perfect and Imperfect Contact.- Finite Element Analysis for Pseudo Hyperbolic Integral-Differential Equations.- A CFL-Free Explicit Scheme with Compression for...
