PROCESS DEVELOPMENT FOR BETTER UTILIZATION OF SEED MEAL CONSTITUENTS

SPS Jan 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x11 mm. Neuware - Sesame (*Sesamum indicum* L.) and mustard (*Brassica juncea* L.) are largely cultivated oil seed crops in India. These seed meals are good source of protein as well as phenolic antioxidants. The seed residue (seed meal) after oil extraction are normally dumped and partly utilized as cattle food supplement. This research basically involves development of membrane based simple technique for isolation of the valuable antioxidants from seed meal...

Reviews

A very wonderful book with lucid and perfect answers. It is probably the most incredible book I have studied. It has been designed in an exceptionally simple way and is particularly just after I finished reading through this publication by which in fact transformed me, altered the way in my opinion.
